

Project Design Phase-I Solution Architecture

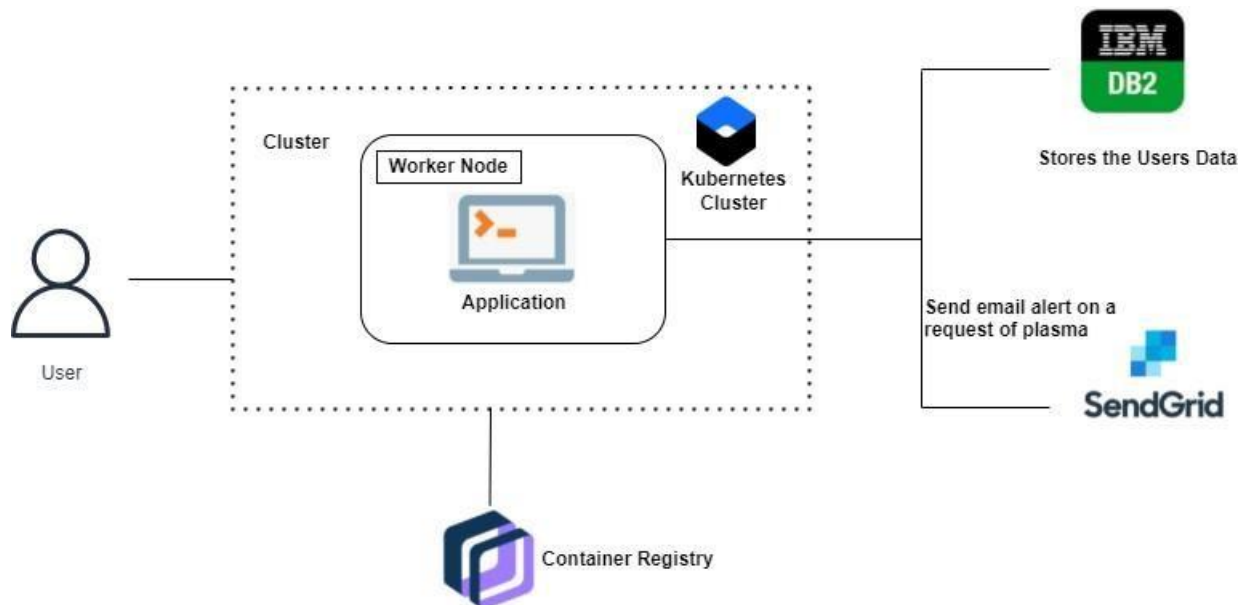

Date	19 September 2022
Team ID	PNT2022TMID20350
Project Name	Project -Plasma Donor Application
Maximum Marks	4 Marks

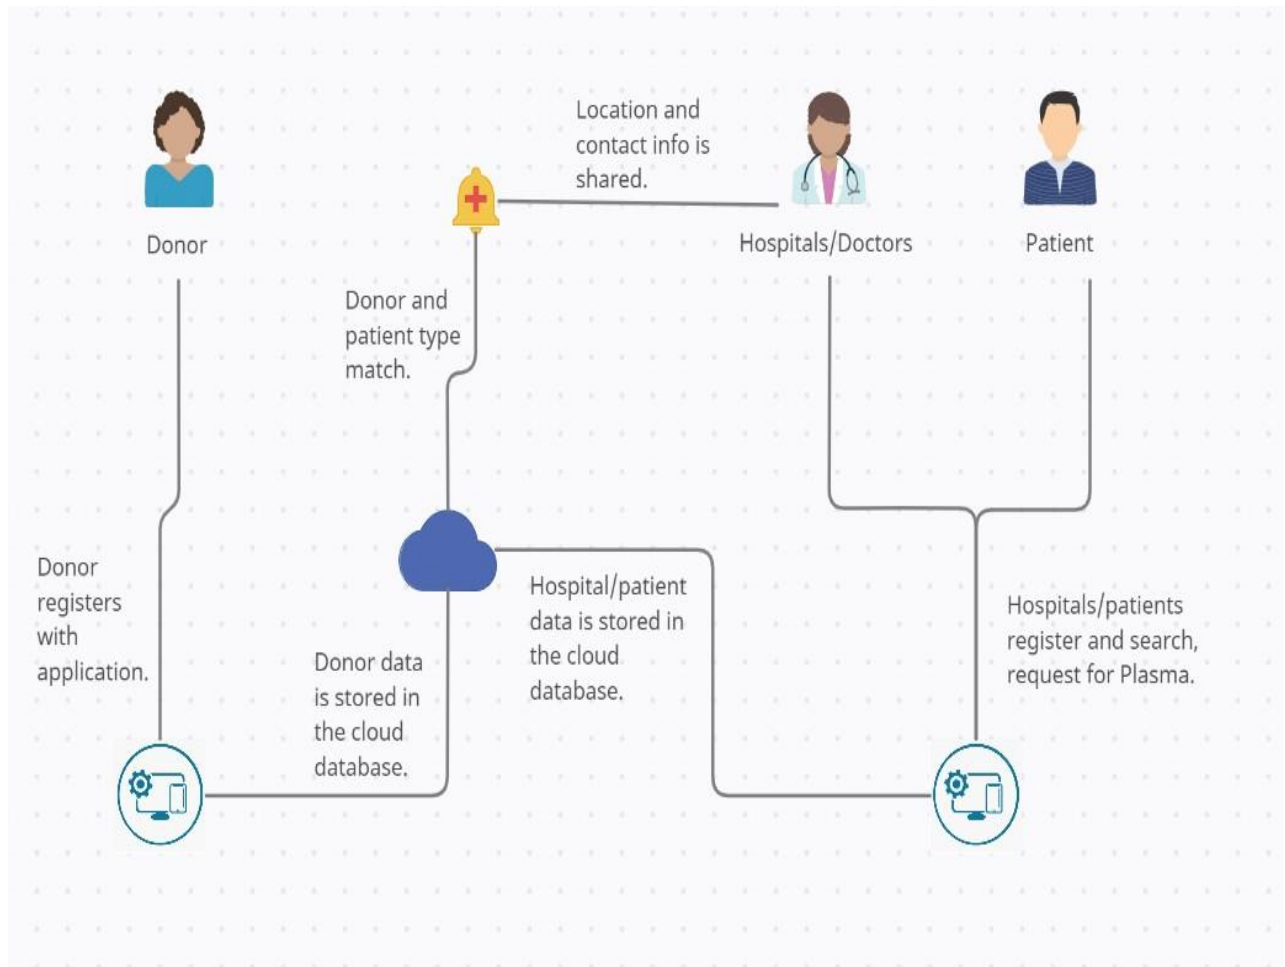

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- The user interacts with the application.
- Registers by giving the details as a donor.
- The database will have all the details and if a user posts a request then the concerned blood group donors will get notified about it.
